

## **Statement of Conformance**

This document certifies that all stainless-steel fasteners supplied conform to the applicable requirements and standards listed below:

### **Stainless Steel Grades:**

- AISI 302
- AISI 304 / 304L
- AISI 305
- AISI 316 / 316L
- AISI 321
- AISI 347
- AISI 410
- AISI 430
- AISI 431
- AISI 440
- AISI 17-4 PH
- AISI 2205 (Duplex)
- AISI 2507 (Super Duplex)

### **Regulatory Compliance:**

- REACH SVHC 253 (Candidate list) per Article 33 of EU Regulation 1907/2006
- REACH Annex XIV of EU Regulation 1907/2006 (Authorization List)
- REACH Annex XVII of EU Regulation 1907/2006 (Restricted List)
- RoHS 2011/65/EU & 2015/863/EU
- CA Prop 65 substances list
- TSCA PBT substances under restriction per US CFR title 40, part 751
- POP Persistent Organic Pollutant regulation 2019/1021
- MCCP Medium-Chain Chlorinated Paraffins

- PFAS Per- and Polyfluoroalkyl Substances

We hereby declare that the above-mentioned products comply with the listed regulations and standards. No restricted substances are intentionally added, and all materials meet the specified requirements.

### **Applicable Exemptions:**

- REACH SVHC (Article 33): Notification exemption if exposure can be excluded and substance registered for that use.
- REACH Annex XIV: Exemptions for uses covered by other EU legislation, PPORD, and specific derogations (e.g., medicinal packaging).
- REACH Annex XVII: Exemptions for certain industrial uses until sunset dates, trace contamination thresholds, and articles in service before restriction date.
- RoHS: Annex III & IV exemptions (e.g., lead in high-temp solders, mercury in lamps, brass alloys up to 4% lead). Medical devices have extended deadlines.
- California Proposition 65: Exemptions for businesses with <10 employees, exposures below safe harbor levels, and naturally occurring chemicals in food.
- TSCA PBT: Exemptions for articles previously sold, disposal activities, R&D uses, and phase-in exclusions for certain substances.
- POP Regulation: Time-limited derogations for specific uses (e.g., UV-328 in LCDs), trace contamination limits, and articles already in use before ban date.
- MCCP: Exemptions for aerospace, defense, and heavy-duty industrial processes until ~2036 under controlled systems.
- PFAS: Proposed exemptions for imported articles, de minimis thresholds, byproducts, impurities, non-isolated intermediates, and R&D quantities.

Disclaimer: Exemptions listed above are subject to change based on regulatory updates. Users must verify current requirements before application.
